## How to Use This Guide

Thank you for your interest in Edutige microphone products!

We've created this handy guide to help you choose the best microphone and accessories that work for your camera, smartphone or recording device.

Each section is specific to a certain type of device. For example, there is a section for Apple devices and another for GoPro action cameras.

Within each section you will find a list of the compatible microphones and accessories for that particular device. There is also information to help you choose the right microphone for a specific purpose or situation.

For example, if you are looking for a microphone for your iPhone and need to record a lecture, you'll see that that EIM-001 will be your best choice.

If you're still unsure what microphone or accessories to choose we have also included a bundle guide. Here you will find which microphones and accessories work well together, and in what situation they are best suited.

Plus, there's a handy section at the end with app recommendations for recording audio or shooting videos.

And if you're still unsure, then feel free to post a message to our Facebook Page at [www.facebook.com/edutige.america](http://www.facebook.com/edutige.america), or send us a direct message via Facebook. You can also email us at [info@edutige.net](mailto:info@edutige.net).

Thanks once again!

Edutige America

## Apple Desktops, Laptops & iOS Devices

(Known OS X issue: Some iMacs, MacBook Airs & MacBook Pros require a cable for OS X to recognize the microphone.)

	Best for increasing input volume, capturing ambient sound and/or voice	Best for capturing a single sound source 6-8 inches away; not recording ambient sound	Extension cable with lapel clip	Get it because you're going to...
EIM-001 4 Pole, Omnidirectional Microphone	○			Record lectures, meetings, or dictate audio notes. Or shoot videos and want clear, high quality audio that's louder than your smartphone or tablet's built-in mic and you don't want a cable attached to you.
EIM-003 4 Pole, Omnidirectional Microphone		○		Record something very specific and you want better quality sound, not louder. Keep the EIM-003 close to your subject for best results. Works great for musicians who need to monitor audio.
ESL-001 Cable, 4.3ft			○	Use the EIM-001 or EIM-003 to record yourself, or you want to place the microphone a short distance away from your smartphone or tablet. For example, if you're making a video and only need to show your face. Has input gain control dial and headphone jack.
ESL-002 Cable, 16.4ft			○	Use the EIM-001 or EIM-003 to record yourself or another subject that is somewhat far away from your smartphone or tablet. For example, if you're making a video and want to show your whole body. Also gives you the option to record something nearby. Has input gain control dial and headphone jack.
ESL-006 Cable, 6.6ft			○	Use the EIM-001 or EIM-003 to record yourself or another subject that is far away from your smartphone or tablet. For example, if you're making a video and want to show your upper body. You can also move in closer to record your face. Does not have input gain control or headphone jack.

## Samsung Galaxy Devices

Due to differences in Android, not every device will be compatible. However, the EIM-001 is known to work with most Galaxy devices.

	Best for increasing input volume, capturing ambient sound and/or voice	Extension cable with lapel clip	Get it because you're going to...
<b>EIM-001</b> 4 Pole, Omnidirectional Microphone	○		Record lectures, meetings, or dictate audio notes. Or shoot videos and want clear, high quality audio that's louder than your smartphone or tablet's built-in mic and you don't want a cable attached to you.
<b>ESL-001</b> Cable, 4.3ft		○	Use the EIM-001 or EIM-003 to record yourself, or you want to place the microphone a short distance away from your smartphone or tablet. For example, if you're making a video and only need to show your face. Has input gain control dial and headphone jack.
<b>ESL-002</b> Cable, 16.4ft		○	Use the EIM-001 or EIM-003 to record yourself or another subject that is somewhat far away from your smartphone or tablet. For example, if you're making a video and want to show your whole body. Also gives you the option to record something nearby. Has input gain control dial and headphone jack.
<b>ESL-006</b> Cable, 6.6ft		○	Use the EIM-001 or EIM-003 to record yourself or another subject that is far away from your smartphone or tablet. For example, if you're making a video and want to show your upper body. You can also move in closer to record your face. Does not have input gain control or headphone jack.

## GoPro Hero2, Hero3 & Hero4

	Best for increasing input volume, capturing ambient sound and/or voice	Best for capturing a single sound source 6-8 inches away; not recording ambient sound	Extension cable with lapel clip	Get it because you're going to...
ETM-001 3 Pole, Omnidirectional Microphone	○			Record lectures, meetings, or dictate audio notes. Or shoot videos and want clear, high quality audio that's louder than your camera's built-in mic and you don't want a cable attached to you.
ETM-006 3 Pole, Omnidirectional Microphone with cable	○		○ Mic is attached to cable, can't be removed.	Need clear audio for a single sound source and you need a lavalier mic. Great for clear recording of one person speaking in a video, or an audio recording of one person.
ETM-008 3 Pole, Unidirectional Microphone		○	○ Includes detachable cable & lapel clip	Record yourself speaking, or there's something specific you want to record, and there's other noise or sounds you don't want recorded. But you have to be no more than 6-8 inches away for the mic to clearly record your sound source. Mic can be used on its own, without the cable.
ETM-003 3 Pole, Omnidirectional Microphone with cable & base	○			Record a meeting or lecture, or shoot a video, and you want to put the mic where you like, instead of having to move your camera or recording device.
EGL-001 MINI USB ADAPTER				Use an ETM-001 or ETM-008 microphone with your GoPro Hero3 or Hero4 and you want a longer cable than the adapter made by GoPro.

## DSLRs, Camcorders, Digital Voice Recorders & PCs

(Canon camcorders are not compatible with Edutige microphones, as they require self-powered microphones)

	Best for increasing input volume, capturing ambient sound and/or voice	Best for capturing a single sound source 6-8 inches away; not recording ambient sound	Extension cable with lapel clip	Get it because you're going to...
ETM-001 3 Pole, Omnidirectional Microphone	○			Record lectures, meetings, or dictate audio notes. Or shoot videos and want clear, high quality audio that's louder than your camera's built-in mic and you don't want a cable attached to you.
ETM-006 3 Pole, Omnidirectional Microphone with cable	○		○ Mic is attached to cable, can't be removed.	Need clear audio for a single sound source and you need a lavalier mic. Great for clear recording of one person speaking in a video, or an audio recording of one person.
ETM-008 3 Pole, Unidirectional Microphone		○	○ Includes detachable cable & lapel clip	Record yourself speaking, or there's something specific you want to record, and there's other noise or sounds you don't want recorded. But you have to be no more than 6-8 inches away for the mic to clearly record your sound source. Mic can be used on its own, without the cable.
ETM-003 3 Pole, Omnidirectional Microphone with cable & base	○			Record a meeting or lecture, or shoot a video, and you want to put the mic where you like, instead of having to move your camera or recording device.

## Adapters & Wind Screens

	APPLE/iOS Devices	Samsung Galaxy Devices	GoPro	DSLR; Digital Voice Recorder; PC	Get it because you're going to...
<b>ETG-003 3 TO 4 POLE ADAPTER</b>	○	○			Use your ETM series (3 pole) microphone with your Apple/iOS device or your Samsung Galaxy device. The ETG-003 lets you get more use out of your ETM series microphone(s).
<b>EWS-003 FURRY WINDSCREEN FOR ALL MICS, EXEPT ETM-008</b>	○	○	○	○	Record something outside and it's windy. The EWS-003 dramatically cuts down on wind noise so you get clear audio.
<b>EWS-004 FURRY WINDSCREEN FOR ETM-008</b>	○	○	○	○	Record something outside and it's windy, and you have an ETM-008. The EWS-004 dramatically cuts down on wind noise so you get clear audio.

## Microphone & Accessories Bundle Guide

	iPhone, iPad, iPod Touch, Apple Desktop/Laptop, Samsung Galaxy Video and/or Audio	GoPro All Purpose	GoPro Close range, specific sound, don't want background noise	DSLR / Camcorder	Digital Voice Recorder	PC	GoPro, DSLR, Camcorder, Digital Voice Recorder or PC with Apple Device + ETG-003 Adapter
Smart Bundle 1 - Boost Your Sound: EIM-001, ESL-006, EWS-003	○

Action Bundle 3 - Lavalier Booster: ETM-006, EGL-001, EWS-003		○		○	○	○	○

## Recommended Apps

Knowing which app will give you the best results isn't easy. In fact, it's a pain in the rear searching, downloading and trying something that ends up not working.

So to help out, we've made a list of apps that we've tried and also given some information about what those apps are good for. We can't cover every app, but this is a good starting point. Hopefully, this will save you some and money and get you creating cool stuff sooner.

### iOS Audio Recording

#### Apple Voice Memos

- Simple to use, gets the job done with a minimum of fuss.
- Best for recording anything and everything because the EIM series microphones give you great quality audio into the app.
- But can't monitor (listen at the same time you're recording), so not the best for musicians or for voiceovers.

#### Apple GarageBand

- Relatively simple to use.
- Lets you monitor what you're recording so it's a good app for musicians and podcasters.
- Fun to use for creating unique audio and music tracks.

#### TwistedWave

- Relatively simple to use, allows greater control over recording.
- Great for recording anything and everything because the EIM series microphones give you great quality audio into the app.
- Allows monitoring so good for musicians or for voiceovers.
- Lots of audio editing options.

## Recommended Apps Cont'd

### iOS Video Recording

#### Apple Camera

- Simple to use, gets the job done with a minimum of fuss, works with all the video functions (normal video & slo-mo)
- Best for recording anything and everything because the EIM series microphones give you great quality audio into the app.
- But can't monitor (listen at the same time you're recording), so not the best for serious videographers.

#### FiLMiC Pro

- Full featured video shooting app used by video pros.
- Gives control over every aspect of the video.
- Allows audio monitoring so you can listen to what you're shooting to ensure audio levels are correct.

### Samsung Galaxy Audio Recording

#### TapeMachine Recorder

- Relatively simple to use, gets the job done with a minimum of fuss.
- Best for recording anything and everything because the EIM-001 microphone give you great quality audio into the app.
- Full featured audio editing and recording functions
- Currently, only the EIM-001 is known to be compatible with Samsung Galaxy devices.

### Samsung Galaxy Video Recording

#### Built In Camera App

- Simple to use, and gets the job done.
- Use it for recording any type of videos and get better sound with an Edutige microphone.
- Currently, only the EIM-001 is known to be compatible with Samsung Galaxy devices.

Thanks for choosing Edutige Microphone products!

We hope this guide has helped you choose the right microphone and accessories for your purposes. We're here to help if you have any other questions, or need some advice about using our products.

Now get out there and make something awesome!
